Congratulations on the completion of your degrees! You and your families have just reason to be proud of your reaching this important milestone, one you will come to appreciate more and more in the years to come.

As you leave *your* university, I would like you to know how much we, the faculty and staff, value your accomplishments as scholars, artists, athletes and leaders. You have enriched your lives and have elevated the esteem of this institution.

We have tried to provide you with a university experience where you could develop your academic interests, your special talents, and broaden your intellectual and cultural perspectives. Our experience also shows that the friends and associations you have made while here will enrich you in many and varied ways throughout your life. I urge you to stay connected with us and take full advantage of being a member of the Maryland family.

I truly hope that you will return to campus often and continue to support this institution and future generations of students at the flagship University of Maryland. Welcome to the university's family of alumni.

Good luck. We are proud of each and every one of you!

Yours sincerely,

C. D. Mote, Jr.

President

Congratulations on achieving this milestone in your educational pursuit. On behalf of the University of Maryland Alumni Association, I add our very best wishes to those you have received from your faculty and other university friends.

Your commencement ceremony today includes a special tradition. You will be officially inducted as a member of the Maryland Alumni Association by this year's association president, Adrian Teel '64. Our gift to you on this special day is a one-year complimentary membership. In the next few weeks, you will receive your membership card and more information on the list of benefits and services you receive by virtue of your membership.

Wherever your plans take you following graduation, you'll find Maryland friends and professional contacts by getting involved in alumni activities. We have more than 30 academic, regional and special interest groups. We offer exciting trips abroad, a fun and educational way to connect with alumni. And, of course, attending Maryland athletic events is always a great way to get together with fellow grads. Regardless of how you choose to stay involved, our purpose remains the same: to respond to the needs and interests of all alumni, and to encourage your continued interest in and loyalty to the University of Maryland.

Remember that as alumni, the University of Maryland is always your home, and we look forward to welcoming you back often in the years ahead. Again, congratulations and best of luck.

Sincerely,

Danita D. Nias '81

Executive Director, University of Maryland Alumni Association

The Winter Graduates*

Applicants for degrees

Total Doctoral Degrees:	485
Total Master's Degrees:	1,074
Total Bachelor's Degrees:	2,407

Five most popular undergraduate majors

1. Criminology and Criminal Justice	118
2. Psychology	93
3. Computer Science	89
4. English Language and Literature	80
5. (tie) Electrical Engineering Finance	79

Most popular master's degrees

1. M.B.A.	50
2. M.S., Electrical Engineering	49
3. M.S., Civil Engineering	34
4. M.L.S. Library and Information Services	32
5. M.S. Mechanical Engineering	31

**August and December combined*

Today you complete the journey that was undertaken several years ago, arriving proudly at the threshold of a new life. When you look back, can you see how this journey has changed you? As you sit here today, what events stand out in your mind as experiences that showed you which path to travel?

We have each followed a unique path but have reached a common destination. As seniors, it is easier to list the ways in which we are different from each other than the ways in which we are bound together.

We are accustomed to describing students in groups—commuters, residents; members of ethnic, religious, or professional organizations; students in particular departments and colleges. These differences should be admired and respected as should the many qualities we share.

From this point, you can reflect on past journeys. Remember what you learned along the way about who you are and what you are capable of achieving.

Know that your time spent at the University of Maryland will help you arrive at your next destination. Finally, always consider our campus to be another home, a stop on your life's journey to which you can always return.

Congratulations!

Senior Council 1999–2000

December 23, 1999 • Cole Student Activities Building • 9:00 a.m.

Individual graduation exercises for colleges and schools will be held at various campus locations on Thursday and several ceremonies will take place on Wednesday evening. Guests are urged to be seated approximately one half-hour prior to the designated time for the ceremonies if they wish to observe the student and faculty processional.

Graduates, their families and friends are cordially invited and encouraged to join with university officials and members of the faculty at the reception to be held in the Grand Ballroom of Stamp Student Union following the campus-wide commencement.

Shuttle bus service will provide free transportation across the campus throughout the day.

A Bold New Era

From its pre-Civil War roots as the state's first agricultural college and one of America's original land grant institutions, the University of Maryland, College Park, has emerged as a public research university of national stature, highly regarded for its broad base of excellence in teaching and research. The momentum of recent years has poised the university to move into the top ranks of higher education and take leadership in shaping the research university of the 21st century.

The university's commitment to quality education in a research environment is key to its academic reputation and the success of its graduates. The research enterprise infuses the curriculum at both the undergraduate and graduate levels,

exposing students to the most pressing issues and challenges in their discipline and training them to respond with rigor as well as creativity to contemporary problems.

There are 13 schools and colleges within the organizational structure of the University of Maryland. Seven of these units—the Smith School of Business, the College of Education, the Clark School of Engineering, the College of Journalism, the College of Computer, Mathematical and Physical Sciences, the College of Library and Information Services and the School of Public Affairs—have been recognized by their peers and in various rankings as among the 25 best in the nation. Programs within the other units have also achieved high levels of

recognition. Our School of Music, for example, has been ranked 30th nationwide. The breadth of this excellence is a source of pride for students, faculty and staff, and is endorsement for the university's flagship status among the state's institutions of higher education.

The university has enjoyed a period of rapid advancement in all of the areas that affect quality. The qualifications of entering students have risen each year for the past 10 years, and SATs now range from 1150 to 1320 for the mid-50 percent tier of students. In fall 1999, 1,239 of the nearly 4,000 admitted first year students scored 1300 or above on their SATs. Sponsored research has doubled in the same 10-year period, and has reached \$203 million for FY99. Private giving has increased even more dramatically, from \$18 million per year at the start of the decade to \$81.7 million in FY99. Alumni Association membership has been growing at an average rate of 10 percent a year since 1992. Coupled with renewed commitment from the state of Maryland for funding flagship initiatives, these factors ensure that the university will continue on a forward trajectory for many years to come.

One of the largest research universities in the United States, current enrollment stands at 24,717 undergraduate and 8,147 graduate students. There are 110

undergraduate programs, 100 master's programs and 70 doctoral programs, and more than 100 centers and institutes engaged in research and outreach.

The university has licensed more than 750 technologies since 1986, and has been issued 135 U.S. patents. An average of two new invention disclosures each week are received by the Office of Technology Liaison, a reflection of the pace of innovative technologies being created at the university.

Faculty at the University of Maryland, in all fields of knowledge, are engaged at the highest levels of national and international concern. The university's location near the center of federal policy-making and international political and economic activity enables it to play an active role in research and analysis of public policy. Strong links to the scientific and technological agencies and organizations of the federal government drive research in the environment, engineering, physics, computer science, life sciences and agriculture. Scholarship in the arts, humanities and social sciences is marked by the spirit of intellectual diversity and interdisciplinary collaboration.

Maryland is one of only 32 public research universities in the prestigious 61-member Association of American Universities and the only public institution in the Maryland-D.C. area with membership in the nation's most distin-

guished honor society, Phi Beta Kappa. It is classified as a Research-I university by the Carnegie Foundation by virtue of the range of its baccalaureate programs, the amount of federal support received, and the number of doctoral degrees awarded each year, sharing that honor with the top research universities in the country.

Fall 1999 Students at a Glance:

Total enrollment:	32,864
Graduate Students:	8,147
Full-time:	4,454
Part-time:	3,693
Undergraduates:	24,717
Students of color:	33%
Full-time:	21,845
Part-time:	2,872
Average age:	23.7
States represented:	50
	<i>(plus Guam, Puerto Rico and the Virgin Islands)</i>
Countries represented:	161

History

The University of Maryland was founded in 1807 in Baltimore as a faculty-owned College of Medicine. The medical school was considered one of the top schools in the country, attracting notable professors and lecturers from throughout the world. In its beginning, tuition cost \$140, grades were sent home weekly to parents, and students could obtain room and board for \$300 annually.

Five years later, the growing institution was renamed the

University Highlights

- In fiscal year 1999, grant and contract awards to the University of Maryland totaled more than \$203 million.
- The September 1998 issue of *Kiplinger's Personal Finance Magazine* named Maryland one of the top 25 values among the nation's public universities.
- Rankings continue to reinforce Maryland's rising reputation. In the latest *U.S. News & World Report* look at undergraduate schools, the Clark School of Engineering, the Smith School of Business and the College of Education were among the top 25. Graduate programs in economics, education, engineering, library science, mathematics, physics and sociology ranked in the top 25. According to *Computenworld* magazine, the Smith School offers the nation's third best technology-oriented M.B.A. program.
- The University Honors Program was spotlighted as an "Ivy League experience" at a bargain price in the *U.S. News & World Report* 12th annual guide to "America's Best Colleges."
- The university collaborates with more than 280 businesses through its Maryland Industrial Partnerships program. The university's incubator has spawned 20 new companies; three have been recognized as among the fastest growing in the state.
- As *Washingtonian* magazine stated in a December 1997 feature article on the rise of the University of Maryland, "The Terps are moving up, and we're not just talking basketball."

University of Maryland. Despite the name, the university was not considered a state institution as it was still owned and operated by faculty. Baltimore College of Dental Surgery, the first dental school in the world, became a part of the university in 1840, awarding the first Doctor of Dental Surgery (D.D.S.) degree in 1841.

In 1859, the Maryland Agricultural College, which would evolve into the University of Maryland, College Park, was opened under a charter secured by a group of Maryland planters in 1856. In addition to spending one hour each day hoeing or plowing on the college farm, students took a broad range of courses in ancient and modern languages, natural sciences, English and mathematics. After a disastrous fire on campus in 1912, the state acquired the college and rebuilt it.

In 1920, the state legislature combined the College Park institution with the professional schools in Baltimore to form an expanded University of Maryland. The entity eventually grew to include campuses in Baltimore County, the Eastern Shore and University College, a continuing education institution.

The following decades saw the increasing growth of student population, excellence in programs and curricula, and the burgeoning of the University of Maryland, College Park, into a nationally rec-

ognized research institution.

July 1, 1988, marked the dawn of a new era in higher education in the state of Maryland, as the five components of the university were merged with six other state universities and colleges to form the University of Maryland System, and College Park secured its flagship status with a mandate to become one of the pre-eminent research universities in the nation.

The Alumni Association

With alumni clubs from Miami to Taipei, Taiwan, the Maryland Alumni Association strives to keep and strengthen ties between the

university and its graduates. Member events such as pre-game parties, bull roasts, picnics, golf tournaments, dinner cruises and subscriptions to *College Park* magazine and the biannual *Maryland Alumni* supplement help keep alumni connected to the university

and to each other. All graduating seniors and successful master's and Ph.D. candidates receive a one-year free membership in the Maryland Alumni Association.

The Alumni

Graduates of the university go on to distinguished careers in a variety of fields. Chosen from thousands of qualified alumni, an inaugural group was inducted into the University of Maryland Alumni Association Hall of Fame in April 1995. They included 21 outstanding individuals who have brought, and continue to bring, great honor to their alma mater. Their achievements are as varied as their lives, but they all have one thing in common: a University of Maryland, College Park, diploma.

Carmen Balthrop, B.A. '71

World-class soprano and mentor to aspiring vocalists

Harry Clifton "Curley" Byrd, B.S. '08

Legendary university president for 18 years

A. James Clark, B.S. '50

Construction magnate and benefactor

William P. Cole, Jr., B.S. '10

Congressman and member of UM Board of Regents for 25 years

Mary Stallings Coleman, B.A. '35

First woman elected as Chief Justice, Michigan Supreme Court

Geary F. Eppley, B.S. '20, M.S. '26

Devoted career to university as

dean of men and athletic director

Charles F. Fefferman, B.S. '66

Youngest winner of Field's Medal, mathematics highest award

Herbert A. Hauptman, Ph.D. '55

Co-recipient of 1985 Nobel Prize in Chemistry

Jim Henson, B.A. '60

Creator of the beloved Muppets

Steny H. Hoyer, B.S. '63

Public servant to Maryland for nearly 30 years

Carlisle Humelsine, B.A. '37

Leader of Colonial Williamsburg Foundation

Wilbur Munro Leaf, B.A. '27

Creator of "Ferdinand the Bull" story

Samuel J. LeFrak, B.S. '40

Internationally acclaimed urban planning leader

Parren Mitchell, M.A. '52

First African-American student and Maryland congressman

Jane Cahill Pfeiffer, B.A. '54

First woman to head a major network; named chair of NBC in 1978

Judith A. Resnik, Ph.D. '77

Pioneering astronaut; died tragically in Challenger shuttle disaster

Chun-Shan Shen, Ph.D. '61

President of Taiwan's National Tsing-Hua University

William Woolford Skinner, B.S. 1895

Nationally prominent agricultural research chemist

Adele H. Stamp, M.A. '24

Dean of Women at Maryland from 1922 to 1960

Reginald Van Trump Truitt,

B.S. '14

Leading naturalist and marine biologist; pioneered Chesapeake Bay research

Millard E. Tydings, B.S. '10

Introduced legislation to create University of Maryland in 1920

**Academic Costume**

The black caps and gowns worn by the students and faculty in the academic procession have been the traditional costume of scholars since the Middle Ages. The ordinary dress of the scholar, whether student or teacher, was similar to that of a cleric. Caps and gowns were probably worn to keep students warm in unheated buildings. Many medieval scholars were tonsured, like monks, and hoods served to cover their shaved heads until the skull cap later took its place.

Even after the Civil War, most students at American universities wore caps and gowns daily while in residence. These varied in design until they were standardized by the American Intercollegiate Commission in 1894. At that time it was decided that all robes would be black. Colors on the trim of the gown were also standardized to indicate the scholar's academic discipline.

A list of department colors follows:

Agriculture: Maize
Arts, Letters, Humanities: White

Business Administration,

Commercial Science: Drab

Dentistry: Lilac

Economics: Copper

Education: Light Blue

Engineering: Orange

Fine Arts, Architecture: Brown

Forestry: Russet

Home Economics: Maroon

Journalism: Crimson

Law: Purple

Library Science: Lemon

Medicine: Green

Music: Pink

Nursing: Apricot

Oratory, Speech: Silver Gray

Pharmacy: Olive

Philanthropy: Rose

Philosophy: Dark Blue

Public Administration, Foreign

Service: Peacock Blue

Public Health: Salmon

Physical Education: Sage Green

Science: Golden Yellow

Social Work: Citron

Theology and Divinity: Scarlet

Veterinary Sciences: Gray

The tassel may also be colored to represent an academic discipline or it may be black. Officially, the tassel is permitted "to lie where it will" on the mortarboard. However, numerous institutions have adopted the practice of having degree candidates wear the tassel on the right front side at the start of the commencement ceremony and then shift them to the left side after degrees are awarded.

Student Marshals

Elected through a nomination process, student marshals are senior leaders who play an important role in the graduation ceremony. Student marshals assist in organizing the thousands of graduates, leading them smoothly through the commencement procession. They also supply extra caps and hoods, and bobby pins to keep headwear secure. December 1999 marshals are listed on page 68 of this booklet.

Senior Gift

The senior gift is a university tradition dating back 89 years. The first senior gift, the iron gate entrance at the Rossborough Inn, was given by the Class of 1910 (although the gate itself was not erected until 1941). The class of 1999 has elected to establish the Henson Garden. The garden will be located on the corner of Library Lane and Campus Drive, site of the future Jim Henson and Kermit the Frog sculpture (Senior Gift, Class of 1998).

The purpose of the senior gift is twofold. Each year the senior class leaves behind a memorable legacy for new students and visitors, and provides the university with a gift that enhances the campus atmosphere.

Past senior gifts have included: the Testudo statue (Class of 1933), the lights around the "M" in the traffic circle on Campus Drive (Class of 1986), restoration of the

Chapel chimes and clock face (Class of 1992) and the Bronzed Seal on North Gate House (Class of 1995).

Academic Degrees

A degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by colleges and universities nationwide. The University of Maryland offers degrees in 110 undergraduate majors, 100 master's programs, and 70 doctoral programs.

The Doctor's Degree

The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner's degree and the research degree. The first type represents advanced training for the practice of various professions, principally Doctor of Medicine, Juris Doctor, Doctor of Pharmacy, and Doctor of Veterinary Medicine. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees ever on March 9, 1841, and invented the name of the degree, Doctor of Dental Surgery (D.D.S.).

The University of Maryland conveys the Doctor of Veterinary Medicine (D.V.M.) to approximately

90 students each year in a program that was instituted in 1980. Graduates receive a diploma containing the seals of both the University of Maryland and its partner institution, the Virginia Polytechnic Institute and State University.

The second type is the research doctorate representing prolonged periods of advanced study. A dissertation that usually accompanies the study is intended to contribute substantially to the body of knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States in 1861 by Yale University. The University of Maryland awarded a Ph.D. for the first time in 1920.

The Master's Degree

The master's degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate. A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts (M.A.) and Master of Science (M.S.) degrees in fields other than agriculture.

The Bachelor's Degree

The bachelor's degree represents the completion of a four-year course of college-level study and is the oldest academic degree

awarded by American institutions of higher learning. It was first conferred in America in 1642 on the first nine graduates of Harvard College. Maryland Agriculture College, which later became the University of Maryland, College Park, awarded its first Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) in 1862.

No matter what his role in life—as a star Terp, professional quarterback, broadcaster or humanitarian—Norman “Boomer” Esiason (UGST '84) leaves a legacy. During his undergraduate years at Maryland, Esiason reigned over a golden era of Terrapin football that still resonates throughout Byrd Stadium today. In 1983, he led the Terps to the Atlantic Coast Conference title and secured them a place in Florida's Citrus Bowl. As an All-American player, Esiason set 17 school records for passing and total offense.

He went on to spend 14 years (1984–97) in the competitive arena of professional football, playing quarterback for the Cincinnati Bengals, the New York Jets and the St. Louis Cardinals. In 1988, he took the Bengals to Super Bowl XXIII and was named the NFL's Most Valuable Player by the Pro Football Writers of America and the Associated Press; he was also voted NFL Player of the Year by *Sporting News* and *Football Digest*. Esiason is among the NFL's top 10 players in all-time passing yards, career completions and career attempts, and ranks 14th overall for all-time touchdown passes.

He has since brought his years of field experience to the broadcasting booth as a commentator for several major networks, beginning in 1991 as an expert analyst for USA Network's coverage of the World League games. He joined ABC as a studio analyst for ABC Sports' coverage of the 1996 and 1997 NFL Playoffs. Now, he has recently completed his second season as an expert commentator on ABC's highly rated NFL Monday Night Football, where he is just as apt to wax nostalgic about his days at Maryland as he is to comment on the game at large.

Perhaps Esiason's most poignant legacy will be the one he leaves for millions of cystic fibrosis patients—including his own son, Gunnar—as founder and president of the Boomer Esiason Foundation. Established in 1993, the foundation employs annual fundraising events, marketing campaigns, individual pledges, corporate contributions and philanthropic grants to heighten public awareness and education about cystic fibrosis, enhance the quality of life for patients, and financially support research aimed toward finding a cure for the disease.

Esiason lives in Long Island, N.Y., with his wife, Cheryl, son Gunnar and daughter Sydney.

Boomer Esiason '84

1999 President's
Distinguished
Alumnus Award

G. Scott Shaw '99

“I came to college to be a better communicator,” says G. Scott Shaw, “and everything I’ve since pursued has fallen under those premises.” In the realm of university communications, the journalism major became familiar to the Maryland community as first a news reporter, then a design instructor, and finally a bi-weekly columnist for the *Diamondback*. He also served as president of the university’s chapter of the Public Relations Student Society of America. Beyond the campus, Shaw found opportunities to expand his communication and design skills as an intern for the High Technology Council of Maryland. “This internship was a perfect fit,” he says, “because it offered me insights into the composition of the state’s technology industry.”

It was also a communications project that first introduced Shaw to the world of hospice care: He designed a brochure for teenagers coping with terminally ill family members that was later used by the Hospice of Prince George’s County. Shaw would go on to volunteer at Hospice events, including the XVIII Annual Hospice Cup Charity Regatta, the largest charity regatta in the United States, and the Beacon of Hope fundraiser for Hospice of the Chesapeake in Millersville, Md. His belief in hospice care has a rock-solid foundation: “The fact that such a service exists in our current medical system is a breath of fresh air.”

Such a phrase may be used by several professors to describe Shaw himself. “He is an energetic, personable and winsome young man,” says Reese Cleghorn, dean of the College of Journalism. And Ralph Bauer, assistant professor of English, proclaims, “He is a committed, serious writer with extraordinary gifts and, no doubt, a bright future.”

Post-graduation, Shaw plans to fulfill his dream of driving cross-country (“Everyone does Europe after graduation. No one does America.”) to explore firsthand the American history and literature that have been his academic passions. By next fall, he will have settled near Boston, Mass., for a career in high-tech public relations that combines writing, technology and politics. He aspires to be an effective writer and one day publish his own magazine.

“I’m looking forward,” says Shaw, “to being successful on my own terms.”

The December 1999 class roster comprises degree candidates from the graduate and undergraduate programs at the University of Maryland, College Park. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative only. The university reserves the right to withdraw or add names. Diplomas (for other than doctoral degrees) will be mailed by the Office of Records and Registration.

Bachelor's degree candidates who have qualified for scholarship honors upon graduation are designated by appropriate symbols adjacent to their names within the alphabetical listing of colleges or schools, pages 25-64.

To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed at least two years of work at the University of Maryland (60 semester hours, 30 of which were earned at the College Park campus) and (2) have a scholastic average of a "B" (grade point average of 3.0) or higher in the University of Maryland work prior to the last semester of registration before the awarding of a degree.

Degree candidates who have met these criteria are shown in the listings as qualifying, upon graduation, for the designations *Summa cum Laude* (if they ranked in the top 2 percent of the candidates in their respective colleges or schools), *Magna cum Laude* (if in the next 3 percent), or *cum Laude* (if in the next 5 percent) based on the grade point averages of students in the preceding three graduating classes of their degree-granting unit.

University Honors Citations

Students who have earned the University Honors Citation may wear red and gold braided cords over their academic gowns.

The Senior Marshal Program began in 1991 as an opportunity to acknowledge outstanding seniors at their commencement. The students selected to be marshals were nominated by faculty, administrators and staff for their outstanding accomplishments and contributions to the University of Maryland. We are proud to recognize these truly remarkable students.
